Dear Hiring Team:

It is with great pleasure that I apply to (...) . I am currently a Junior majoring in Computer Information Systems at the College of Saint Scholastica (CSS) and I am very eager to find an opportunity to use my computer programming, technical, and analytical skills in a professional working environment. I would like to obtain a position with your company for this coming summer 2023 as it matches my interests and growth potential with your exciting projects and the team collaboration. I thrive in a team environment being the captain of the soccer team at CSS, and working at ALLETE, Inc, as an IT specialist and I enjoy working closely with others as well as working independently. I had the privilege to be part of start-ups building new products that allowed me to further develop my entrepreneur mindset to focus on my passions, solving complex technical, and business problems.

After reading the internship description for the Software Development Intern and comparing it to my personal experiences, I think I could be a great fit. I have experience that I've built from projects using python,raspberry pi, linux, Java,Notepad++, c# and Power Automation, that I think are helpful for this position . Due to my passion for blending my programming skills with my creative abilities, and the skills I built working with hardware at the CSS IT Help Desk for 2 years and becoming a team leader, I feel I could bring valuable insight filling this position. Not only would I learn and benefit from this experience, but finish the internship leaving a footprint.

I would very much enjoy the opportunity to use my knowledge of computer programming in the field. I look forward to meeting you and I hope to hear from you soon. Please contact me at jfsawma@gmail.com or on my phone number (312)-350-5121.

Best regards,

Jad Saouma
